Implementation

2018

Agricultural Projects & Practices > Cropland Erosion Control

This project is located adjacent to a 303(d) waterway listed for sediment. By converting from surface irrigation to pivot sprinkler irrigation, this project will decrease sediment runoff and will increase water use efficiency.

The Resource Conservation and Rangeland Development Program provides low interest loans to landowners for projects and practices that provide conservation benefits. All loans made to borrowers are repaid to the state with interest.

Key Accomplishments

- Irrigation System, Sprinkler (acres): **86.00 acres**
- Pipeline (linear feet): **3,700.00 lf**

Project Themes

- Agricultural Lands
- Healthy Watersheds
- Rangelands
- Soils
- Water

Tracker tells stories at a broad-brush level. Individual project performance measures and expenditures should not be relied upon for complete and total accuracy and should be confirmed with a project's lead implementer. Project locations subject to confidentiality provisions under state and federal law specify the location of a local conservation district or USDA service center office.
